EDUCATION

FACULTAD DE INGENIERÍA — 2021 - 2022
Systems engineering — Montevideo, Uruguay

HENRY BOOTCAMP — FEB 2022 – JUNE 2022
Certified Fullstack Web Developer — Buenos Aires, Argentina

WORK EXPERIENCE

DANGO DIGITAL | FRONT END DEVELOPER | OCT 2022 - NOV 2026

- Custom E-commerce Development: Expertise in building and customizing e-commerce websites from scratch or using tailored Shopify Liquid templates to meet specific client needs.
- WordPress Development: Proficient in maintaining and creating WordPress sites, utilizing PHP, custom themes, and plugins to enhance functionality and performance.
- Code Optimization & Refactoring: Strong ability to debug, refactor, and enhance existing code, resolving issues efficiently while ensuring compatibility and optimization for both Shopify and WordPress platforms.

BUYWITHIRIS | DEVOPS ENGINEER | OCT 2024 - OCT 2025

- CI/CD: Worked on continuous integration and delivery pipelines and deployment processes.
- Cloud Infrastructure: Hands-on experience with cloud storage and deployments, strengthening knowledge of scalable systems.

TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript, PHP.
- Frontend Development: React, Redux, Redux Toolkit, Next.js, HTML5, CSS3, SASS.
- Backend Development: Node.js, Express, REST APIs, webhooks.
- Shopify & E-commerce: Shopify Liquid theme development, Shopify CLI, Admin GraphQL API, Shopify Flow, Shopify Bundles, Customer Events / Custom Pixels, Shopify Collective.
- CMS & Platforms: WordPress, Sanity.
- DevOps & Cloud: CI/CD, cloud storage, deployments.
- Databases & BaaS: SQL (PostgreSQL via Supabase) and NoSQL.
- Data & Analytics: Google Analytics, conversion and ad tracking, cookie consent setup, data cleanup and deduplication, churn analysis, Google Sheets reporting dashboards.
- Development Tools: Git, GitHub, GitLab, AI-assisted development.
- Agile Methodologies: Scrum.
- SEO: On-page optimization and technical SEO.

SOFT SKILLS & COMPETENCIES

- Technical Consulting: Translate client business needs into technical solutions, scope projects, and flag risks before they become problems.
- Client Communication: Write clear technical explanations for non-technical clients, in both English and Spanish.
- Creative Problem-Solving: Find workarounds for platform limitations and debug complex issues across systems and integrations.
- Cross-Functional Collaboration: Work closely with designers, marketers, project managers and clients across multiple concurrent projects.
- Adaptability: Quickly pick up new platforms, APIs and tools, including platform deprecations and migrations.
- Ownership & Responsibility: Take projects from audit to delivery with a careful, documented approach, especially on live production stores.

- Detail-Oriented: Precise in data work, development and documentation.
- Continuous Learning: Consistently expanding skills, currently with AI-assisted workflows and automation.

CERTIFICATIONS & LANGUAGES

- Shopify Development Fundamentals: Verified Skill Badge.
- EF SET English Certificate: 63/100 (C1 Advanced).
- Languages: Spanish (native), English (C1, professional working proficiency).

INDIVIDUAL PROJECTS

INSTABLOGS | FULL STACK | NOV 2023

- A blogging platform built to foster a collaborative community among freelancers. InstaBlogs allows users to share experiences, ideas, and questions through engaging posts, encouraging active participation through comments and discussions. The platform enables freelancers to connect, exchange knowledge, and grow together in a dedicated space designed for their needs.
- Technologies: Next.js, Tailwind CSS, Prisma, MongoDB

  Repository | Site

ATTEND APP | FULLSTACK | MAY 2022

- A backend and frontend application that connects people for services and skills. It includes roles, authentication, chat, payments, and more.
- Technologies: React, Redux Toolkit, Node JS, PostgreSQL, CSS3, Bootstrap, SweetAlerts, FullCalendar, JWT Authentication, momentJS, Express, nodemailer.

  Repository

VIDEOGAMES WEB APP | FULL STACK | APRIL 2022

- A Single Page Application (SPA) designed to reinforce concepts learned during development studies, while also applying best practices and gaining experience with GIT workflow. The app allows users to explore and manage video games data through dynamic front-end interactions and a powerful back-end.
- Technologies: React, Redux, Node.js, Sequelize, PostgreSQL, Redux Thunk, Express, JavaScript, CSS, HTML5
